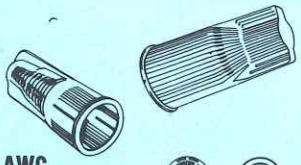
B•CAP
TRADEMARK

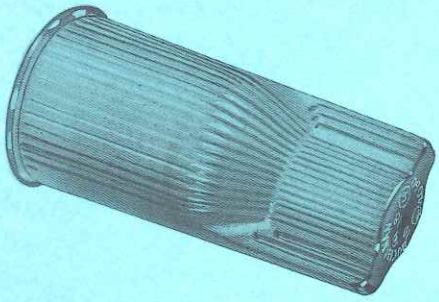
Connectors



UL Listed for Wire Sizes #18 Through #10 AWG
(B-1 B-CAP Connectors will also handle #24 AWG or equivalent combinations)

UL LISTED FOR COPPER TO COPPER, COPPER TO ALUMINUM AND ALUMINUM TO ALUMINUM COMBINATIONS

Catalog No. B-1
(Color-coded Yellow)



Catalog No. B-2
(Color-coded Red)

B-CAP connectors by BUCHANAN are tool-less, reusable wire connectors designed for finger tip application. They can be used many times without damage to connector or conductors — and the same size, larger, or smaller conductors can be used the second time around.

- UL AND CSA LISTED: B-CAP connectors are listed by UL as pressure type cable connectors and fixture type splicing connectors.
- NYLON INSULATOR: Rated at 105°C. Nylon has high dielectric strength. Its flexibility eliminates cracking and chipping.
- FINGERGRIP FINS: Torquing fins designed as finger grips do not extend beyond outside diameter of skirt, will not snap off. Design permits neat tucking back of connection.
- LESS BULK: B-CAP connectors are available in two sizes, B-1 and B-2. Catalog No. B-1 is only 15/16″ long and has an outside diameter of 7/16″ at the open end. The wire hole opening is 11/32″ in diameter. Catalog No. B-2 is 1-1/8″ long and has an outside diameter of 1/2″ at the open end. The wire hole opening is 7/16″ in diameter.
